DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, and 54 drawn to methods of determining operating parameters of a rod pump, classified in class 417, subclass 248.
 - II. Claims 24-53, drawn to methods of controlling and optimizing the performance of rod pumps, classified in class 417, subclass 53.
2. Inventions I. and II. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I. has separate utility such as a process for obtaining pump parameters for the sole purpose monitoring and data collection purposes, while invention II. has separate utility pertaining to a process of optimization of pump operation. The inventions have different functions, the first group pertains to method steps of determining pump parameters such as voltage, torque, pump load, and pump stroke position, while the second group has steps such as using command signals to cause the down-hole pump to closely follow the polished rod position by varying parameters such as voltage, while limiting tensile and compressive forces excursions in the rod load to preset limits. Both inventions have separate utility, involve different method steps, and can be separately patentable. See MPEP § 806.05(d).

Art Unit: 3746

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

The inventions are distinct, each from the other because of the following reasons:

4. Because these inventions are distinct for the reasons given above and the search required for Group II. is not required for Group I., restriction for examination purposes as indicated is proper.

5. A telephone call was made to Leonard Kalinowsky on 11/01/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
